Chokepoint Stress & Exposure

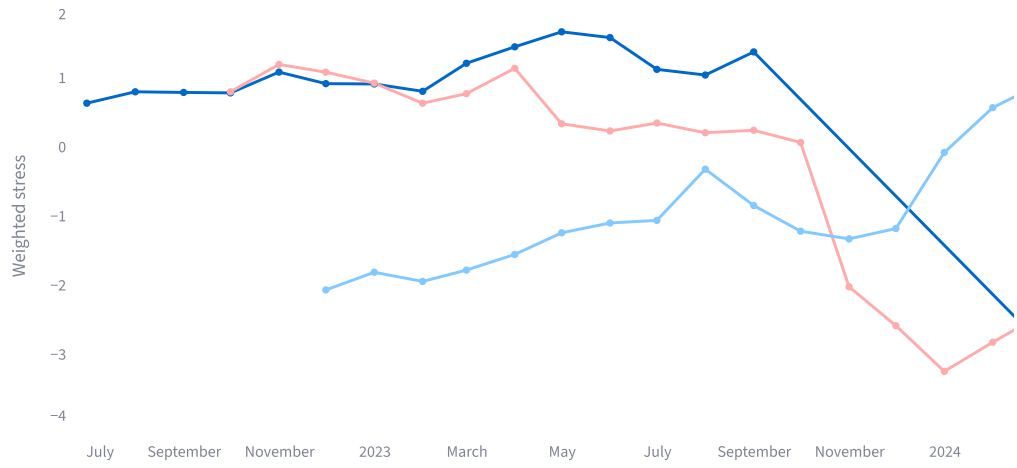
Operational chokepoint stress and trade exposure do not fall evenly across countries or commodities.

Scope: All trade from 2022-07 to 2025-05.

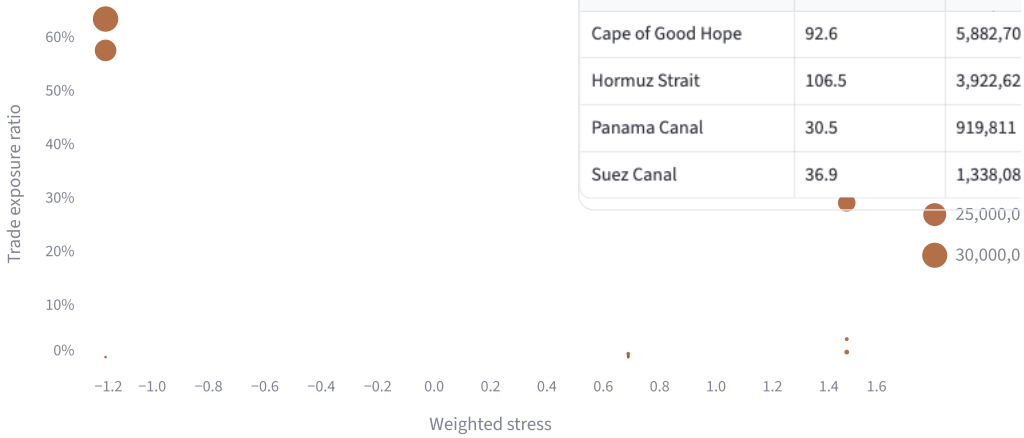
Latest traffic month	Latest exposure month	Most stressed chokep…	Highest latest exposure
2025-05	2025-05	Cape o…	63.2%

Spain shows the highest latest mapped exposure in the filtered window.

Cape of Good Hope carries the highest weighted stress in the latest traffic snapshot



Spain sits at the highest latest reporter-level exposure point



Latest traffic snapshot

Chokepoint	Avg vessels	Avg capa
Cape of Good Hope	92.6	5,882,70
Hormuz Strait	106.5	3,922,62
Panama Canal	30.5	919,811
Suez Canal	36.9	1,338,08

Route-level commodity evidence shows where chokepoint dependence is actually carried

Reporter	Chokepoint	Commodity
China	Malacca Strait	Petroleum oils and oils obtained from bituminou
India	Malacca Strait	Petroleum oils and oils obtained from bituminou
Brazil	Cape of Good Hope	Soya beans, whether or not broken (1201)
India	Hormuz Strait	Petroleum oils and oils obtained from bituminou
India	Bab el-Mandeb	Petroleum oils and oils obtained from bituminou
Metropolitan France	Suez Canal	Petroleum oils and oils from bituminous minerals
India	Bab el-Mandeb	Petroleum oils and oils from bituminous minerals
Brazil	Cape of Good Hope	Petroleum oils and oils obtained from bituminou
Indonesia	Malacca Strait	Petroleum oils and oils from bituminous minerals
China	Malacca Strait	Soya beans, whether or not broken (1201)

Download chokepoint commodity evidence

Methodology

- Traffic and weighted stress come from `raw.portwatch_monthly`, after canonicalizing PortWatch chokepoint names to align with the marts.
- Reporter exposure comes from `analytics_marts.mart_reporter_month_chokepoint_exposure` and is evaluated at the latest filtered exposure month.
- Route-level commodity evidence uses `analytics_marts.fct_reporter_partner_commodity_route_month` when that optional fact is present.
- The raw PortWatch feed covers fewer chokepoints than the exposure marts, so some chokepoints may appear in exposure views without a matching traffic trend.
