Energy Vulnerability Context

Structural energy dependence adds context to trade exposure by showing which countries are intrinsically more fragile.

Scope: All trade from 2019-12 to 2026-09.

Structural energy indicator

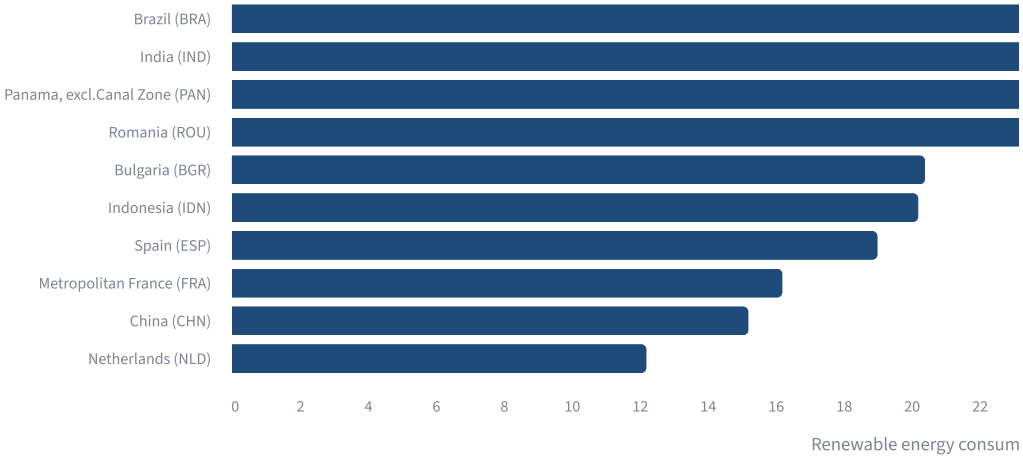
Renewable energy consumption (% of total final energy consumption)

Latest usable year	Highest latest reporter	Highest indicator value	Highest linked exposure
2021	Brazil	46.5 p…	86.5%

Brazil ranks highest on renewable energy consumption (% of total final energy consumption) in the latest usable year.

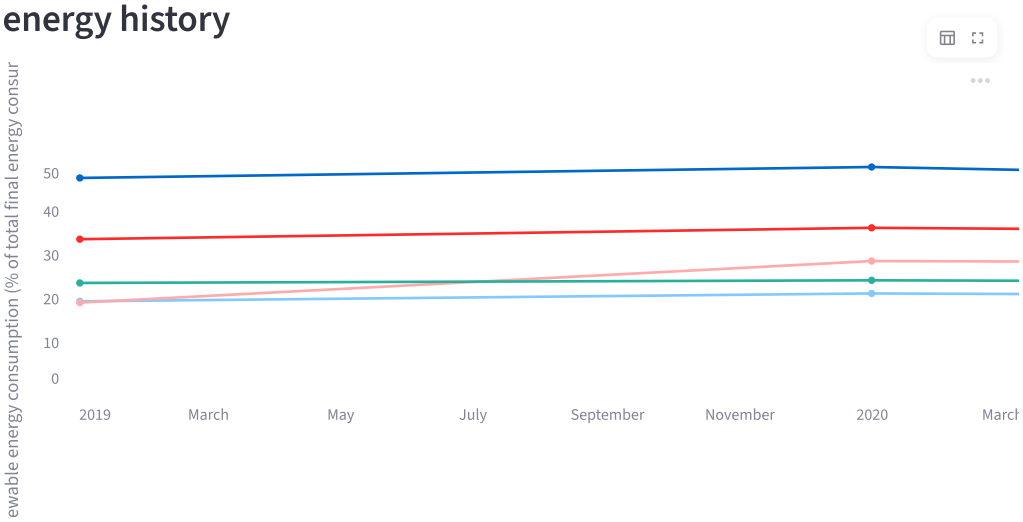
This page provides structural context. It does not replace the trade and chokepoint marts as the primary exposure measures.

Brazil sits highest on the latest available reading of renewable energy consumption (% of total final energy consumption)



Download latest energy ranking

The same reporters remain elevated across the available energy history



Energy dependence is most useful when paired with energy trade scale and latest reporter exposure

Reporter	ISO3	Indicator	Value	Unit
Brazil	BRA	Renewable energy consumption (% of total fi	46.5	percent
India	IND	Renewable energy consumption (% of total fi	34.9	percent
Panama, excl.Canal Zone	PAN	Renewable energy consumption (% of total fi	28.0	percent
Romania	ROU	Renewable energy consumption (% of total fi	23.6	percent
Bulgaria	BGR	Renewable energy consumption (% of total fi	20.4	percent
Indonesia	IDN	Renewable energy consumption (% of total fi	20.2	percent
Spain	ESP	Renewable energy consumption (% of total fi	19.0	percent
Metropolitan France	FRA	Renewable energy consumption (% of total fi	16.2	percent
China	CHN	Renewable energy consumption (% of total fi	15.2	percent
Netherlands	NLD	Renewable energy consumption (% of total fi	12.2	percent

The largest energy-trade footprint among the ranked reporters is $713.5B.
